Weiguang Liu

Email: Github:

October 21, 2026

Experiences

- Adjunct Lecturer, School of Management, UCL, April 2026-present
- Research Affiliate, Center for Finance, UCL, October 2026-present
- Quantitative Researcher Intern, Qube Research & Technologies Academy, 2025–2026
  - Conducted research project using machine learning to reduce transaction costs in long-short equity trading strategies.
- Postdoctoral Research Fellow, UCL, 2023–2025
  - Supervisor: Prof. Áureo de Paula

Education

- PhD in Econometrics, University of Cambridge, 2024
  - Supervisor: Prof. Oliver Linton
  - Degree Committee: Prof. Xiaohong Chen; Prof. Alexei Onatski
- Visiting Assistant in Research, Yale University, 2021–2023
- MPhil in Economic Research (Distinction), University of Cambridge, 2017
- BSc in Mathematics and Applied Mathematics (Double Major), Peking University, 2016
- BSc in Economics, Peking University, 2016

Research

Journal articles

[1] Should We Augment Large Covariance Matrix Estimation with Auxiliary Network Information? (with Shuyi Ge, Shaoran Li, Oliver Linton, and Wen Su). *Journal of Econometrics*, Volume 255, May 2026, Article 106236. [DOI]

[2] Normal Approximation for U-Statistics with Cross-Sectional Dependence. *Journal of Econometrics*, Volume 258, November 2026, Article 106325. [DOI]

Working papers

[1] Prediction Sets and Conformal Inference with Interval Outcomes (with Áureo de Paula and Elie Tamer). *Journal of Econometrics* (Revise and resubmit). [PDF]

[2] Optimal Promotional Cycles under Finite Customer Memory (with Will Ma, Chung-Piaw Teo, and Lan Wu).

[3] Estimating Covariance Structures in Multi-Period Asset Portfolios.

[4] High-Dimensional Covariance Estimation with Structural Information.

Work in progress

[1] Identification of Binary Choice Models with Additive Fixed Effects and Nonlinear Index Functions (with Áureo de Paula and Bo Honoré).

[2] Bootstrap of U-statistics under Cross-Sectional Dependence.

[3] Nonlinear Beta Tests in Asset Returns (with Oliver Linton).

[4] Spectral Analysis of Sparse Covariance Estimators.

[5] Valid Inference for Regression Models with Many Covariates and Network Dependence (with Cheuk Ng).

Teaching and Activities

Teaching experience

- MSIN0302 Further Quantitative Methods, UCL, School of Management, 2026

Teaching assistant

- University of Cambridge
  - MPhil R301a Time Series, 2020–2021
  - MPhil E300 Econometric Methods, 2020–2021
  - MPhil E300 Econometric Methods (Best Teaching Award), 2019–2020
  - MPhil F400 Asset Pricing, 2018–2019
  - Undergraduate Paper 6 Banking and Finance, 2018–2019
  - MPhil E101 Applied Microeconomics, 2017–2018

Conferences

- Econometric Society World Congress, Korea, 2025
- IAAE Annual Meeting, Turin, 2025
- Stochastic Dominance and Quantile-based Methods in Financial Econometrics Workshop, Cambridge, 2025
- Workshop on Recent Developments in Econometrics, CUHK, April 3, 2025
- Econometrics Seminar, University of Manchester, November 7, 2024
- INFORMS Annual Meeting, Seattle, October 2024
- UCL-CeMMAP Econometrics Research Day, UCL, September 2024
- 7th International Conference on Econometrics and Statistics, Beijing, July 19, 2024
- European Winter Meeting of the Econometric Society, Manchester, December 17–19, 2023
- Big Data Conference, University of Cambridge, May 2023

Referee services

- *Journal of Econometrics*, *Journal of Financial Econometrics*

Scholarships and Prizes

- Cambridge Trust, Grace & Thomas C. H. Chan Cambridge International Scholarship; Research Fund from the Faculty of Economics, University of Cambridge. Excellent Graduate Awards by the Beijing Municipal Commission of Education and Peking University;
